

**Junior Group Leader**  
**Cell Signalling Department, CABIMER**

<http://www.cabimer.es/web/abelardo.lopez@cabimer.es>

We are looking for a junior group leader with a strong record and outstanding publications in **“Animal models to study signalling during cell adhesion, migration and metastasis”** or related topics. Candidates should be prepared to lead an independent group and collaborate with the scientific community of the Cell Signalling Department and CABIMER. Candidates should submit an expression of interest letter. Selected candidates will be invited for an interview/seminar to present their past achievements and their future research program. Selected candidate will be encouraged to apply for a permanent position funded by the Spanish National Research Council (CSIC).
