

## PostDoc Position Available!

The newly established **Ubiquitin signaling and proteomics** group headed by **Dr. Román González Prieto** at the Andalusian Center for Molecular biology and Regenerative Medicine (**CABIMER**) is offering a PostDoc contract in call from the University of Sevilla.

**The Candidate:** The candidate must hold a Doctor degree (recognized by Spanish authorities or in process of recognition).

Previous experience in the following topics will be an advantage:

- ubiquitin/SUMO field
- genome biology (chromatin organization, DNA repair or replication
- CRISPR screens
- Proteomics
- Post-translational modifications

**The project:** The project aims to understand what determines that the chromatin is modified by SUMO. We will combine molecular biology with high throughput genomics and proteomics approaches.

**The contract:** The contract is in principle for 1 year with the possibility of extension. Starting September/October 2023. Salary: 28k€/year approximately.
