

Postdoctoral Position – RNA Editing and Disease Lab (CABIMER, Seville)

We are seeking a **highly motivated postdoctoral researcher** to join the *RNA Editing and Disease Lab* at **CABIMER** (Centro Andaluz de Biología Molecular y Medicina Regenerativa), located in **Seville, Spain**.

About the project

Our research explores the **interplay between RNA editing and the DNA damage response**, with a strong focus on understanding its **role in rare human diseases and cancer**. The project involves cutting-edge molecular and cellular biology approaches to uncover novel mechanisms with potential translational relevance.

Profile sought

- PhD in Molecular Biology, Biomedicine, or a related field.
- Hands-on experience in **molecular and cellular biology**, including mammalian **cell culture**.
- Strong motivation, scientific curiosity, and ability to work both independently and collaboratively.

We offer

- A **full-time, 1-year postdoctoral contract**, with the possibility of extension depending on funding and performance.
- A dynamic, collaborative research environment at **CABIMER**, an international center equipped with state-of-the-art technology.
- The opportunity to contribute to impactful biomedical research and career development support.

How to apply

Send your **CV** and contact information for **at least one referee** to:
sonia.jimeno@cabimer.es
