

CABIMER hosts invited Speakers every Friday at 12:00 noon
 Please check our website for updates

www.cabimer.es

December

- 4th** *The Eukaryotic Replisome: Structure and Mechanism*
Joseph Yeeles
 MRC Laboratory of Molecular Biology, Cambridge (UK)

January

- 15th** *Alternative Lengthening of Telomeres in cancer: triggers and alleviators*
Claus Azzalin
 Instituto de Medicina Molecular, Lisboa, (Portugal)
- 22nd** *Genome-wide analysis of DNA repair at single-nucleotide resolution*
Andrés Clemente
 Instituto de Biología Funcional y Genómica (IBFG), Salamanca, (Spain)
- 29th** *Mitochondrial dynamics and metabolic disorders*
Antonio Zorzano
 Institute for Research in Biomedicine (IRB), Barcelona, (Spain)

February

- 5th** *Can melatonin reduce the severity of COVID-19 pandemic?*
Germaine Escames
 Centro de Investigación Biomédica de la Universidad de Granada, Granada (Spain)
- 19th** *Understanding beta cell heterogeneity from the single protein to the intact islet*
David Hodson
 Institute of Metabolism and Systems Research (IMSR), and Centre of Membrane Proteins and Receptors (COMPARE), University of Birmingham, Birmingham (UK)
- 26th** *Emerging immunomodulatory roles of galectin-3 under conditions of neurodegeneration*
José Luis Venero
 Instituto de Biomedicina de Sevilla (IBIS), Sevilla (Spain)

March

- 5th** *Redox control of protein aggregation through the autophagy master regulator TFEB/HLH-30*
Antonio Miranda
 Instituto de Biomedicina de Sevilla (IBIS), Sevilla (Spain)

March

- 12th** *Physiology of the adult carotid body germinal niche*
Ricardo Pardal
 Instituto de Biomedicina de Sevilla (IBIS), Sevilla (Spain)

May

- 7th** *Targeting the DNA-damage response in cancer treatment*
Josep Vicent Forment
 DNA Damage Response biology Oncology R&D AstraZeneca, Cambridge (UK)
- 14th** *Unraveling the dynamic nano- and meso-scale architecture of the living cell membrane*
María García Parajo
 The Institute of Photonic Sciences (ICFO), Barcelona (Spain)
- 21st** *Cytoskeleton meets Chromatin: the role of Myosin VI in DSB repair*
Hans-Peter Wollsheid
 Institute of Molecular Biology (IMB), Mainz (Germany)
- 28th** *Pathogenic mechanisms of CoQ deficiency*
Plácido Navas
 Centro Andaluz de Biología del Desarrollo (CABD), Sevilla (Spain)

June

- 4th** *A CRISPR view of transcriptional termination*
Steven West
 University of Exeter, Exeter (UK)
- 25th** *Impact of the subventricular zone on glioblastoma aggressiveness*
Hugo Guerrero-Cazares
 Clínica Mayo, Florida (USA)

July

- 9th** *Principles and consequences of spatial organization of the genome*
Peter Askjaer
 Centro Andaluz de Biología del Desarrollo (CABD), Sevilla (Spain)

This season's conferences can be attended through an invitation link that will be published in advance.
